Superintendent: Nancy Nordine (763)421-1064 Show Location: Green Exhibit Building

1. Entries will be released the Monday after the fair
2. Exhibitors are limited to one (1) entry per class and must be grown during current year unless otherwise stated.
3. A pot or hanging basket may contain more than one plant of the same variety. Only 1 variety per pot.
4. LABEL FLOWERS WITH THEIR VARIETY and ENTERED IN CORRECT CLASS WHEN SPECIFIED.
5. **Bottles will no longer be provided for your flower entries. Water will still be available for your convenience.**
6. **Flowers are not judged by the container. Please use appropriate sized containers, not of value, for the entry. Does not have to be a vase**
7. Must have correct count of specimens listed in class.
8. Do NOT enter in "any other" or "not listed" class when there is a designated class.

### Guide Lines for Flowers

1. When 3 stems are called for, they should all be the same color.
2. Petunias should be washed with soapy water and the old seed pods removed from the stem.

### Guidelines for Lilies

1. Day lilies, Hemerocallis, grown from plants, have a leafless scape (stem) and a class of their own.
2. Calla Lilies are in a class of their own.
3. Lilies are grown from bulbs, oriental are fragrant with large leaves. Tiger are splashed with dots and have re-curved petals. Trumpets have elongated flowers that form a trumpet. Asiatic are hard to describe. Use a seed catalog and compare your lily to those in the catalog to identify yours.
4. Do not remove anthers.

### Guidelines for Flower Arrangements

Flowers: Quality and condition of flowers is very important. Flowers and foliage must be firm and has good texture. There should be no signs of disease or insects, foliage, and flowers should be clean. Color must be clear and bright. Flowers and foliage should be properly hardened. Flowers that wilt too quickly should be avoided (cleome, coreopsis, etc.) Flowers with sap need to be heat treated (poppies, dahlias, hollyhocks, etc)

Arrangement: Avoid crowding, airiness in design is very important. A well-planned arrangement enhances the beauty of the flowers in the design. Choice and creative use of color is important. Color harmony must be considered and colors chosen carefully to fit one of the following color schemes:

1. One color (monochromatic)
2. Neighboring colors
3. Complementary (opposite) colors
4. Triad colors that form three points of a triangle on the color wheel, such as red, yellow, blue.

Spike, round and sprays flower's shapes should be used in a harmonious and creative way. The arrangement should be in balance (a feeling of stability), either symmetrical or asymmetrical. The form of an arrangement (round vertical, horizontal, triangular, must be appropriate for the intended use.

For Example: table arrangement must be low enough to allow conversation across the table.

Container: The container should be simple, neutral in color and not compete with the flowers and foliage. White containers should only be used if there are white flowers in the arrangement. The container should complement the flowers and foliage colors and textures and container size must be in proportion with the size and shape of the arrangement.

### Principles of Design

Entire flower arrangement should show the knowledge of the 6 principles of design:

1. Balance - a feeling of stability of the design.
2. Rhythm - a flow through the design that allows the eye to move smoothly from 1 area to another.
3. Dominance - 1 color, 1 flower shape or one fine direction is "dominant" over the others in the design.
4. Contrast - gives variety to the design, could be done with texture, line or color.
5. Proportion - size relationships of flowers to a container, arrangement to surroundings.
6. Scale - size relationships of various parts of the flower design to each other.
